SIEVE INSPECTION DIN 3310-2

4 INCH SIEVE BARRELS

### SPECIFICATION

Test sieves are produced in two sizes, 4 and 8 inch diameter. The plates which are made from Stainless Steel comprise 19 sizes in a set. The sieves provide a means of checking accurately the size of Diamonds. The holes are produced to an accuracy of within 0.0005 inches. The plates are secured in a Stainless Steel bezel and are accommodated in a plastic barrel with receptacle.

Each set has a polished wooden numbered rack holding the 19 plates. **Plate Sizes : 1/2/3/4/5/6/7/8/9/19/11/12/13/14/15/17/19/21/23.**

**Note :** Each plate is individually inspected to the highest industry standard.
